I. WAGE RATES INDEXES

..	Explanatory notes	2
----	-------------------	----	----	---

Adult male wage rates

Weekly rates:

1.	Industry groups, States, 30 June 1971	..	4
2.	All groups, States, June 1969 to June 1971	..	5
3.	Industry groups, Australia, July 1969 to June 1971	..	6
4.	Commonwealth and State awards, etc., States, June 1969 to June 1971	..	10
5.	Commonwealth and State awards, etc., Australia, June 1939 to June 1971	..	11

Hourly rates:

6.	Industry groups, States, 30 June 1971	..	12
7.	All groups, States, June 1969 to June 1971	..	13
8.	Industry groups, Australia, July 1969 to June 1971	..	14

Adult female wage rates

Weekly rates:

9.	Industry groups, States, 30 June 1971	..	18
10.	All groups, States, June 1969 to June 1971	..	19
11.	Industry groups, Australia, July 1969 to June 1971	..	20

Hourly rates:

12.	Industry groups, States, 30 June 1971	..	24
13.	All groups, States, June 1969 to June 1971	..	25
14.	Industry groups, Australia, July 1969 to June 1971	..	26

II. BASIC WAGES, MINIMUM WAGES, AND INCREASES IN "TOTAL WAGES"

15.	Commonwealth basic wage rates	..	30
16.	State basic wage rates	..	31
17.	Minimum wage, adult males - Commonwealth awards	..	32
18.	Minimum wage, adult males - State awards	..	32
19.	General increases in award "total wages"	..	33

III. AVERAGE WEEKLY EARNINGS

..	Explanatory Notes	..	34
20.	Average weekly earnings, States, 1966-67 to June quarter 1971	..	35
21.	Average weekly earnings, Australia, 1961-62 to June quarter 1966	..	35

IV. SURVEYS OF WEEKLY EARNINGS AND HOURS

..	Explanatory notes	..	36
..	Average weekly earnings and hours:	..	36
22.	Industry groups, Australia, October 1970	..	37
23.	Industry groups, Australia, adult males, October 1963 to 1970	..	38
24.	All industry groups, States, October 1963 to 1970	..	39
25.	Overtime and ordinary time, Australia, October 1966 to 1970	..	40
26.	Average weekly earnings, Male managerial etc. staff, October 1963 to 1970	..	41

I. WAGE RATES INDEXES

1. This section contains particulars of weighted average minimum weekly and hourly wage rates for adult males and adult females for Australia and each State, together with index numbers with base : year 1954 = 100.
2. The wage rates used in the compilation of the indexes are the lowest rates for a full week's work (excluding overtime) prescribed for particular occupations. Relevant rates of prescribed "minimum wage for adult males" (see page 32) are used where applicable. The ten per cent additions to minimum wage rates for adult males first prescribed in some Western Australian State awards in October 1970, are included in the wage rates (see page 31). For some occupations general loadings of various kinds are included. Loadings, etc. that are not applicable to all workers in a specified award occupation (for example, those payable because of length of service; working in wet, dirty or confined places; excess fares incurred due to location of building site) are not included in the wage rates indexes. In the majority of cases the rates used in the indexes are prescribed in awards or determinations of Commonwealth or State industrial authorities or in collective agreements registered with them. Rates prescribed in unregistered collective agreements are used where these are dominant in the particular industries to which they refer.
3. The Wage Rates Indexes are based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April 1954, which showed the number of employees covered by individual awards, determinations and collective agreements, and provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November 1954. This second survey showed the number of employees in each occupation within selected awards, etc., in the various industries, thereby providing occupation weights.
4. The minimum wage rates used in the indexes are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and collective agreements in force at the end of each period commencing with March 1939 for adult males and March 1951 for adult females. The index for adult males includes rates for 3,415 award designations. However, as some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,313. For adult females the corresponding numbers are 1,100 and 515. By use of the industry and occupation weights derived from the surveys described above, these rates were combined to give weighted averages for each industry group for each State and Australia. Because of coverage difficulties the rural industry is not included in the indexes.
5. Because the indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries", those awards, etc. which relate solely or mainly to salary-earners are excluded. Thus awards relating to employees in the Finance and Property industry group (banking, insurance, etc.) are excluded as are awards relating to occupations such as engineers, scientists, architects, teachers, nurses, etc. and to administrative employees in government services. Some awards that specify annual rates of pay for certain occupations mainly in government employment (for example, mail officers, postal officers, drivers, linesmen, telecommunications technicians, clerks and clerical assistants, office machine operators, typists, telephonists, etc.) are included.
6. The indexes are designed to measure trends in wage rates in current awards etc. excluding the effects of changes in the relative importance of industries, awards and occupations. The weighted average wage rates shown in the tables in this section are therefore indexes expressed in money terms, and do not purport to be actual current averages. Similarly, neither these weighted average wage rates nor the corresponding index numbers measure the relative levels of average current wage rates as between States or industries.
7. Since 1954 the industrial structure in Australia has undergone changes which are likely to have had some effects on the representativeness of the regimen of the indexes. These effects are mitigated because occupations in new or expanding industries are often covered by existing awards and the wage rates for new occupations usually conform very closely to those for existing occupations. Also, where an entirely new award has been made and the number of employees affected has warranted such action, occupations from

the new award have been introduced into the indexes. These latter cases have not been of great significance.

8. Weighted average minimum weekly wage rates for adult males covered by "Commonwealth awards, etc." and for those covered by "State awards, etc." (as defined below) are shown separately in Tables 4 and 5.

Relevant definitions are as follows:

"Commonwealth awards, etc." include awards of, or collective agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator.

"State awards, etc." include awards or determinations of, or collective agreements registered with, State industrial tribunals together with certain unregistered collective agreements where these are dominant in the particular industries to which they refer.

9. The proportion of employees covered by Commonwealth and State awards, etc. varies considerably between States. In addition, the proportions of employees engaged in the respective industries and occupations differ from State to State. As a result there may be relatively wide differences between the weighted average wage rates in the several States.

10. Weekly wage rates for adult males cannot be compared directly with average weekly earnings per employed male unit shown in Section III, because the latter include the actual earnings of all wage earners and salaried employees (whether adult or junior, full-time or part-time, casual, etc.) in all industries. The figures of earnings are quarterly averages and include, in addition to wages and salaries at award, etc. rates, overtime earnings, over-award and bonus payments, and payments made in advance or retrospectively during the periods specified. They also reflect changes in the importance of different industries and occupations. Certain of these differences also apply to the average weekly earnings figures shown in Section IV.

11. Wage rates and index numbers for adult males are available as at the end of each quarter from March 1939 to December 1956 and as at the end of each month from January 1957. Particulars for adult females have been compiled quarterly from March 1951 to June 1967 and monthly from July 1967. For details of wage rates and index numbers from 1939 reference should be made to the following bulletins.

Minimum Wage Rates, March 1939 to June 1965 (Reference No. 6.17)

Wage Rates Indexes, June 1965 to June 1968 (Reference No. 6.21)

Wage Rates and Earnings, June 1970 (Reference No. 6.16) (for final figures July 1968 to June 1969)

Wage Rates and Earnings, June 1971 (Reference No. 6.16) (for final figures July 1969 to June 1970)

Figures subsequent to June 1970 will be found in the monthly

bulletins, Wage Rates and Earnings, commencing with the June 1971 issue.

12. In some cases, when awards, etc. are varied, the new wage rates are made retrospective. Also there is generally an unavoidable, and sometimes considerable, delay in the receipt of notification of changes in wage rates in respect of the occupations included in the indexes. Because of these delays, etc. figures for July 1970 and subsequent months are subject to revision. As such revisions are made they are published in the normal monthly tables of this bulletin. Considerations of space preclude the publication herein of revised figures for each industry group in each State but these are available on request. Final figures for months to June 1970 will be found in bulletins listed in paragraph 11 above. Final figures for months to June 1971 will be published in the June 1972 issue of Wage Rates and Earnings bulletin.

TABLE 1. - WEEKLY WAGE RATES : ADULT MALES (a)

INDUSTRY GROUPS, 30 JUNE 1971 (b)

Weighted average minimum weekly rates payable for a full week's work (excluding overtime), as prescribed in awards, determinations, etc.; and index numbers of wage rates.

II. BASIC WAGES, MINIMUM WAGES, AND INCREASES IN "TOTAL WAGES"

Information in this section gives details of basic wage rates (pages 30 and 31), rates of minimum wage for adult males (page 32), and general increases in award "total wages" (page 33), prescribed in recent years in awards of Commonwealth and State industrial tribunals. For further information on wage determination in Australia see the Official Year Books or the annual Labour Reports. The Appendix to Labour Report No. 54, 1968 and 1969 (pages 335-347) contains long-term tables showing Commonwealth and State basic wage rates.

TABLE 15. - COMMONWEALTH BASIC WAGES : WEEKLY RATES (\$)

In June 1967 the Commonwealth Conciliation and Arbitration Commission decided to eliminate basic wages and margins from its awards and to introduce total wages to operate from the beginning of the first pay-period commencing on or after 1 July 1967 (see page 33). Basic wage rates for earlier periods are published in the Appendix to Labour Report No. 54, 1968 and 1969.

Date operative	Sydney	Melbourne	Brisbane	Adelaide	Perth	Hobart	Six capitals
ADULT MALES							
1966 11 July (a)	33.50	32.70	31.00	32.30	32.80	33.40	32.80

1969 24 November	36.45	27.88			
1970 26 October (i)	38.45	29.40			

(a) Rates are operative from the beginning of the first pay-period commencing on or after the date shown. (b) Fixed loading of \$1 a week added to award rates for adult males and adult females operative from 1 July 1967 to 1 January 1968 when loading was absorbed in basic wages. (c) Basic wages and margins deleted from wages board determinations and wage rates expressed as total wages (see page 33). (d) Fixed loading of \$1 a week added to award rates for adult males and adult females operative from 3 July 1967 to 28 October 1968 when loading was absorbed in basic wages. (e) An economic loading of 3 per cent of the sum of the living wage plus margin was added to all award rates of pay from 22 December 1969. As from 4 January 1971 the economic loading was absorbed in the living wage and margins; a new living wage was determined; and margins were further increased by 6 per cent. (f) In addition to the basic wage increases, margins in awards were increased by 3 per cent in December 1969 and by 6 per cent in January 1971. (g) Special loading of 60 cents a week added to award rates for adult males and adult females operative from 1 July 1967. Loading increased to \$1.95 operative from 25 October 1968 to 22 November 1968 when loading was absorbed in basic wages. (h) Rates shown are operative in the Southern Division - Eastern District (including Brisbane). District allowances are added for other areas - see Labour Report No. 54, 1968 and 1969 (page 155). (i) Some Western Australian State awards include provisions for additions to minimum wage rates for adult males equal to ten per cent of the sum of the basic wage and margins. These provisions were first prescribed in October 1970.

NOTE. See explanatory notes on page 30, details of minimum wage on page 32, and details of general increases in award "total wage" on page 33.

TABLE 17. - MINIMUM WAGE, ADULT MALES, WEEKLY RATES (\$)
AWARDS OF COMMONWEALTH CONCILIATION AND ARBITRATION COMMISSION

In its decision of 8 July 1966 in the Basic Wage, Margins and Total Wages Cases of 1966, the Commonwealth Conciliation and Arbitration Commission announced that it intended to grant relief to low wage earners by inserting a provision in awards prescribing a minimum wage. The provisions inserted in the awards state that no adult male employee shall be paid at less than the prescribed minimum rates as ordinary rates of pay in respect of the ordinary hours of work prescribed by the award. The weekly rates of minimum wage prescribed were the appropriate basic wages plus \$3.75 a week.

Weekly rates of minimum wage prescribed in Commonwealth awards include those set out below. Changes in the rates since they were first introduced are shown in the following table.

Date operative (a)	Sydney	Melbourne	Brisbane	Adelaide	Perth	Hobart	Canberra	Darwin (b)
1966 11 July	37.25	36.45	34.75	36.05	36.55	37.15
1967 1 July	38.25	37.45	35.75	37.05	37.55	38.15
1968 25 October	39.60	38.80	37.10	38.40	38.90	39.50
1969 19 December	43.10	42.30	40.60	41.90	42.40	43.00	42.60	45.30
1971 1 January	47.10	46.30	44.60	45.90	46.40	47.00	46.60	49.30

(a) Rates are operative from the beginning of the first pay-period commencing on or after the date shown. (b) Rates shown for Darwin are applicable north of the 20th parallel of south latitude. Rates for south of this parallel are \$1.60 a week less.

TABLE 18. - MINIMUM WAGE, ADULT MALES, WEEKLY RATES - STATE AWARDS (\$)

State awards in five States include provisions prescribing rates of minimum wage for adult males similar in concept to the Commonwealth award provision of minimum wage (see above). The first date shown is the date when the concept was first adopted in the State. Subsequently similar provisions were adopted for other awards, etc. Variations in the rates since they were first introduced are also shown in the table.

(a) Rates are operative from the beginning of the first pay-period commencing on or after the date shown. (b) Rate shown is operative in the Southern Division - Eastern District (incl. Brisbane). District allowances are added for other areas - see Labour Report No. 54, 1968 and 1969 (page 155).

NOTE. See explanatory notes on page 30, details of basic wages on pages 30 and 31, and details of general increases in award "total wages" on page 33.

TABLE 19. - GENERAL INCREASES IN AWARD "TOTAL WAGES"

All weekly rates of total wages for adult males and adult females in awards of the Commonwealth Conciliation and Arbitration Commission and Victorian Wages Board determinations have been increased as set out below since basic wages and margins were eliminated from these awards etc. (see pages 30 and 31). (Basic wage increases and general loadings added to wage rates in those State awards where basic wages still operate are indicated in Table 16 on page 31.)

Date operative (a)	Adult males	Adult females
COMMONWEALTH AWARDS		
1967 1 July	\$1.00	\$1.00
1968 25 October	\$1.35	\$1.35
1969 19 December	3 per cent	3 per cent
1971 1 January	6 per cent	6 per cent
VICTORIAN WAGES BOARD DETERMINATIONS		
1967 1 July	\$1.00	\$1.00
1968 25 October	\$1.35	\$1.35
1969 19 December	3 per cent	3 per cent
1971 1 January	6 per cent	6 per cent

(a) Operative from the beginning of the first pay-period commencing on or after the date shown.

NOTE. See explanatory notes on page 30, details of basic wages on pages 30 and 31, and details of minimum wage for adult males on page 32.

III. AVERAGE WEEKLY EARNINGS

Estimates of average weekly earnings were revised in August 1971. The complete set of revised estimates for the period September quarter 1961 to June quarter 1971 is shown in the two tables which follow, but for a detailed explanation concerning the revision reference should be made to the May 1971 issue of this bulletin.

2. The estimates are derived from particulars of employment and wages and salaries recorded on pay-roll tax returns, from other direct collections and from estimates of the unrecorded balance. The figures relate to civilians only. In addition to salary and wage payments at award rates, the total earnings figures used in the calculation of average weekly earnings include the earnings of employees not covered by awards, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the period, etc.

3. Particulars of wages and salaries paid are not available for males and females separately from the sources used for this series; average weekly earnings have therefore been calculated in terms of male units, i.e. total male employees plus a proportion of female employees, the proportion being determined by the estimated ratio of female to male average earnings. Different ratios, based on information from the annual surveys of weekly earnings and hours, from a sample survey carried out in November 1969 and from other sources, have been used for individual States. The ratios are as follows: New South Wales (including the Australian Capital Territory) 54 per cent, Victoria 53, Queensland 52, South Australia (including the Northern Territory) 50, Western Australia 49 and Tasmania 49. As the number of male units used in calculating Australian average weekly earnings is the sum of the estimates for the States, a separate ratio for Australia as a whole is not used, but the weighted average of the State ratios is approximately 52.5 per cent.

4. Because of the adoption of a new definition of the labour force at the June 1966 population census there is a break in comparability between June and September quarters of 1966 in the employment series used in the calculation of average weekly earnings. For this and other reasons (in particular, the lack of precise information about the ratios of female to male earnings in the several States for 1965-66 and earlier years) it is not possible to make a comparable series of State estimates for periods prior to September quarter 1966. However, in order to provide a broad indication of trends over a longer period, estimates for Australia as a whole have been calculated for the period back to September quarter 1961 by methods and on a basis that are as nearly as possible comparable with those used for the current series. These estimates are shown in Table 21.

5. The quarterly figures in money terms are affected by seasonal influences. For example, special payments, including prepayment for holiday periods, tend to raise the December quarter and to depress the March quarter averages. In addition, figures for all quarters are affected by the varying incidence of pay days in successive quarters. Allowance for the varying incidence of pay days and for seasonal factors has been made in calculating the seasonally adjusted estimates shown in the tables. It should also be noted that seasonal adjustment factors were estimated from a series adjusted to allow for the effects of major awards and determinations of Commonwealth and State industrial authorities. The effects of these awards and determinations are retained in the seasonally adjusted data. A detailed description of the methods of seasonal adjustment will be published in conjunction with the September quarter 1971 issue of "Average Weekly Earnings", (Reference No. 6.18).

6. For a number of reasons, average weekly earnings per employed male unit cannot be compared directly with the weekly wage rates shown in Tables 1-5. The figures in Tables 1-5 are weighted average minimum award etc. rates payable to adult male wage earners in non-agricultural industry for a full week's work, at the end of each month or year. Those in Tables 20 and 21 represent actual average weekly earnings for all wage earners and salaried employees (whether adult or junior, full-time or part-time, casual, etc.) and are quarterly or annual averages.

IV. SURVEYS OF WEEKLY EARNINGS AND HOURS

General - Since 1960 a number of statistical surveys of wages and hours of work in Australia have been conducted. Each of these surveys is listed below and reference made to the publications containing detailed results.

Survey of Wage Rates and Earnings, September 1960 - For results of this survey of marginal rates of wage and actual weekly earnings of full-time adult male employees see Labour Report No. 50, 1962 and 1963 (pages 80-83).

Survey of Weekly Earnings, October 1961 - Results of this survey about the distribution of actual weekly earnings of full-time adult males were published in Labour Report No. 50, 1962 and 1963 (pages 83-86).

Surveys of Weekly Earnings and Hours, October 1962, 1963 and 1964 - Results of these surveys showing comparison with similar surveys conducted in October in the years 1966 to 1970, were published in statistical bulletin, Survey of Weekly Earnings and Hours, October 1970 (Reference No. 6.1) (see below).

Survey of Weekly Earnings, October 1965 - This survey obtained average weekly earnings for full-time adult and junior males in private and government employment; and for full-time adult males, the number in various weekly earnings groups, and a dissection of total weekly earnings, into overtime earnings, ordinary time earnings at "award, etc. rates", and ordinary time earnings in excess of "award, etc. rates". For detailed results see Labour Report No. 53, 1967.

Surveys of Weekly Earnings and Hours, October 1966 to 1970 - As for the surveys of October 1962, 1963 and 1964 these surveys obtained figures of average weekly earnings, average weekly hours paid for, and average hourly earnings for adult and junior males and females in private employment, separately by industry groups and by States. In addition, also obtained were details of average weekly overtime earnings and overtime hours for full-time male and female employees in private employment (other than managerial etc. staff). The surveys were conducted from stratified random samples of private employers subject to pay-roll tax excluding those in rural industry and in private domestic service.

A summary of some of the results of the October 1970 survey together with some comparisons with the results of earlier October surveys are shown in Tables 22 to 25. For more detailed results (including average weekly earnings of managerial etc., staff) and comparisons, particulars of coverage, definition of terms used, and some interpretation of the meaning of the figures see statistical bulletin, Survey of Weekly Earnings and Hours, October 1970 (Reference No. 6.1). As these surveys were based on samples, the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only a sample of employers was surveyed. The extent of the detail published in the statistical bulletin and in the following table has been determined after considering estimated measures of sampling variability. In addition to affecting the results of each sample survey, sampling variability also affects comparison between each year's results.

NOTE. For some comparative purposes it will be useful to bear in mind that the full effect of the October 1968 general award wage increases of \$1.35 a week (see pages 31 and 33) is unlikely to have been reflected in wages and salaries paid during the last pay-period in October 1968. These increases operated as from the beginning of the first pay-period commencing on or after 25 October 1968 in the case of awards etc. of the Commonwealth Conciliation and Arbitration Commission and of each of the State tribunals except Queensland and South Australia, where the operative date was 28 October 1968.
